1	1 T-LSD	 <p>The chemical structure of 1-T-LSD (1-(2,4,6-trimethylphenyl)-4-(2,5-dimethyl-1H-imidazol-5-yl)-N,N-diethyl-L-tryptamine) is shown. It features a tryptamine core with a 2,4,6-trimethylphenyl group at the 1-position and a 2,5-dimethyl-1H-imidazol-5-yl group at the 4-position. The tryptamine side chain is substituted with two ethyl groups on the nitrogen atom. The structure is drawn with stereochemistry: the hydrogen atom at the 4-position of the tryptamine ring is shown with a wedge bond, and the diethylamino group is shown with a dash bond.</p>
