

# 知事指定薬物一覧

	通称名	構造式等
1	1Bz-LSD	 <p>The structure shows a lysergic acid derivative with a benzoyl group at the 1-position and a diethylamino group at the 2-position. The ergoline ring system is fused to a benzene ring, and the nitrogen at position 8 is substituted with a benzoyl group.</p>
2	NBoc-DMT, NB-DMT	 <p>The structure shows a tryptamine derivative with a tert-butoxycarbonyl (Boc) group at the 2-position and a dimethylamino group at the 3-position.</p>
3	4F-4-MAR, 4-fluoro-4-Methylamino rex, para-fluoro -4-methylam inorex, 4F-MAR, 4-FPO	 <p>Two chemical structures are shown. The left structure is 4-fluoro-4-methylaminorex, featuring a 4-fluorophenyl group attached to a 4-methylaminorexane ring. The right structure is 4-fluoro-4-methylaminorex, featuring a 4-fluorophenyl group attached to a 4-methylaminorexane ring with a methyl group at the 3-position.</p>
